

## Main logo, clear space and alignment

In this section we'll look at the clear space of the Bambuser logotype and how it works together with other brands.

### Clear space

When placing a partner brand in a vertical stack the Y margin can never be less than half of the logotype's height. For horizontal stacking the clear space can never be less than one third of the logotype's total width.

### With other brands

The partner brand should align to the bambuser baseline (the stroke being excluded) and scale to the tip of the Bambuser logotype (stroke included).
